

TRIPLE DRAGON SELLS CAMLAREN PROPERTY

May 4, 2010 – Triple Dragon Resources Inc. (CNSX: TDN) (the “Company”) announces that it has entered into an agreement to sell the Camlaren Property (the “Property”) located in the Northwest Territories to Cats Eye Capital Corp. (“Cats Eye”), a TSX Venture Exchange (“TSX-V”) listed capital pool company.

The Property consists of two mineral claims encompassing approximately 2,426.7 acres near the southern end of Gordon Lake, within the south-central part of Northwest Territories. The historic Camlaren Mine, located within the Property, has been the focus of gold exploration in the Gordon Lake area since its discovery in the 1930’s. Significant gold production was reported from the Camlaren Mine in 1963 and 1980-1981. Although there has been historic gold production on the Property, it is considered an early-stage exploration property. The Company conducted a field program at Gordon Lake in August 2009 to locate and map historic mine workings and showings and collect samples of quartz vein, muck, tailings and trench debris. Prospecting was conducted across a large portion of the Property, with samples collected from veined and altered sections of outcrop.

Pursuant to the Agreement, Cats Eye agreed to acquire the Property from the Company in exchange for the issuance of 3,000,000 Cats Eye common shares at a deemed price of \$0.10 per share. All of the Cats Eye common shares issued to Triple Dragon will be subject to a four month statutory hold period and may be subject to escrow arrangements. It is anticipated that the Property will be used for Cats Eye’s Qualifying Transaction under the rules of the TSX-V. Completion of the sale of the Property is subject to the results of Cats Eye’s due diligence review on the Property, Cats Eye receiving regulatory approval of the transaction and the satisfaction of certain other conditions precedent standard in property acquisitions.

About Triple Dragon Resources Inc.

Triple Dragon Resources Inc. is a mineral exploration company focused on gold exploration in the Gordon Lake region of south-central Northwest Territories, Canada. Management will continue to capitalize on its land position in the region as well as evaluate additional value-creating opportunities. The Company’s shares are listed on the Canadian National Stock Exchange under the symbol "TDN".

The CNSX does not accept responsibility for the adequacy or accuracy of this news release.

Statements in this document which are not purely historical are forward-looking statements, including any statements regarding beliefs, plans, expectations or intentions regarding the future. Forward-looking statements in this news release include that the shares to be issued in connection with the sale of the Property may be subject to escrow, that the completion of the sale of the Property is subject to the results of Cats Eye’s due diligence review on the Property, their receipt of regulatory approval and the satisfaction of certain other conditions precedent standard in property acquisitions.

It is important to note that actual outcomes and the Company’s actual results could differ materially from those in such forward-looking statements. *Risks and uncertainties include, but are not limited to, economic, competitive, governmental, environmental and technological factors that may affect the Company’s operations, markets, products and prices.* Factors that could cause actual results to differ materially may include: misinterpretation of data; that we may not be able to get equipment or labour as needed; that we may not be able to raise sufficient funds to complete our intended exploration and development; that our applications to drill may be denied; that weather, logistical problems or hazards may prevent us from exploration; that equipment may not work as well as expected; that analysis of data may not be possible accurately and at depth; that results which we or others have found in any particular location are not necessarily indicative of larger areas of our properties; that we may not complete environmental programs in a timely manner or at all; market prices may not justify commercial production costs; and that despite encouraging data there may be no commercially exploitable mineralization on our properties. Readers should refer to the risk disclosures outlined in the Company’s Management Discussion and Analysis of its audited financial statements filed with the British Columbia Securities Commission.
