Steve Williams, CEO of Pasinex commented, “Horzum AS produced as expected for the first six months of 2019, with an operating gross margin of 61%. However, the first six months of 2019 ended with a net loss of \$495,104 after recognition of an impairment of the Akmetal receivable of approximately \$3,000,000.

We continue to stand by the original production guidance for 2019 which indicated 14,000 – 17,000 tonnes (wet) for the year.”

Pasinex Highlights

- For the three and six months ended June 30, 2019 Pasinex incurred an approximately \$0.1 million and \$0.3 million loss, respectively, compared to net income of approximately \$0.9 million for the three months ended June 30, 2018 and approximately \$1.7 million for the six months ended June 30, 2018. The decrease in net income is largely due to lower equity gains from Horzum AS.
- The equity gains from Horzum AS for the three and six months ended June 30, 2019 were approximately \$0.3 million and \$0.5 million, respectively, compared with approximately \$1.8 million and \$4.8 million for the same periods in 2018, respectively.
- In May 2019, the Company entered into a Debt Agreement with Akmetal to resolve the collectability of the trade receivable owing from them to Horzum AS. The terms of the Debt Agreement include a minimum amount of repayments on a monthly basis plus the chance for additional repayments from proceeds Akmetal would receive from the sale of its other assets. Akmetal has not honoured the terms of the Debt Agreement and has not been able to complete the sale of its other assets as it had planned. As a result, the financial positions of Horzum AS and the Company have weakened further.
- In May 2019, the Company received \$100,000 from a shareholder of the Company. Subsequent to the end of the quarter the Company received an additional \$30,000 from a shareholder of the Company.
- Subsequent to the quarter ended June 30, 2019, the Company appointed a new Chief Financial Officer to its management team.
